

# HealthCare Solutions

# Temporary Environments For the Healthcare Industry

A solution is the Expo-Profile lightweight aluminum modular system that can be combined with fabric, acrylic, metal, PVC, wood and glass.

The system can create temporary modular wall systems that are:

- easy to move and reconfigure
- versatile to create almost unlimited configurations
- customizable (designed to fit your space)
- easy to clean
- delivered to your facility
- installed by our professionals

We will work with you to determine the most effective solution possible based on your unique requirements for functionality.

We offer rental and purchase options to clients

Please review the following examples of our modular system
